

SIGNIFICANT APPLIED RESEARCH RESULTS WITH AN IMPACT OTHER THAN AN ECONOMIC ONE ON SOCIETY

Result type	Name	Anticipated impact
Nmets methodology approved by the competent authority	RIV/44555601:13410/15:43886707 – Methodology of standardized procedure for exhibition presentation of project outcomes. Standardized procedure for preparation of the accompanying lecturer programme (2015)	The methodology has an impact on the preparation of exhibition projects and teaching activities; it's an instrument for teachers, museum workers or other organisers of exhibitions or teaching programmes.
Ekrit organizing an exhibition with a critical catalogue	RIV/44555601:13410/15:43887419 – Without Borders. The Art exchange in the Ore Mountains region between Gothic and Renaissance (2015)	As a result of a long-term research, the exhibition has become one of the supporting documents for the nomination for the mining landscape of the Ore Mountains region to the UNESCO World Heritage List.
Nmap specialized map with a professional content	RIV/44555601:13410/15:43887309 – The Endangered Cultural Heritage in the Border Region of the North-western Bohemia	The specialized map created an effective instrument for local authorities, interest groups and private individuals that identify the most vulnerable monuments in the region which are subsequently documented. Documentation is available to owners in order to restore them.
Nmap specialized map with a professional content	RIV/44555601:13410/15:43887313 – The spacetime landscape change below Milešovka mountain and its cultural heritage	The specialized map created an effective instrument for self-governing bodies, interest groups and private individuals in the Milešovsko micro-region (part of the Central Bohemian Uplands). The heritage fund was documented in detail and all documents were prepared for a subsequent revitalization. The documents are available to owners to restore them.
W Organizing a workshop	RIV/44555601:13410/18:43894310 – Effective Field Research and Documentation of Historical Buildings Serving for Hop Processing	The workshop was organized as part of an ongoing project focused on objects related to hop growing in the Žatec region. It is a unique hop-growing area that, with the support of the Ústí Region and the town of Žatec, is nominated for the UNESCO World Heritage List. Effective research and documentation at this stage helps to prepare the necessary documentation. The impact of a successful nomination would have a major positive impact on the whole region (tourism, small business development, etc.)
